

More Trains, More Services

Wollongong Stabling Yard and Platform Extension project

What's the latest news?

Over the past couple of months, we have been completing site surveys and preparation work at Wollongong Station as part of the More Trains, More Services program. These early activities are required to enable us to carry out main construction activities in the rail corridor later this year.

In order to improve train services for customers on the south coast, we are making the platforms longer at Wollongong Station. These extensions will make it easier for customers to access all carriages of the New Intercity Fleet, new 10-car trains that will provide an improved level of comfort, convenience and reliability for intercity customers.

In addition to extending the platforms, the works also include relocating platform fences, stairs and gates, realigning and installing new overhead wiring and signalling equipment, and improving safety on the platforms through upgraded lighting, closed circuit television, passenger announcement systems and tactile paving and line marking.

What's coming next?

This month we will continue enabling work within the stabling yard, as well as:

- removing stock piles
- installing sediment controls
- installing fencing within the corridor.

Construction vehicles including excavators and spoil removal trucks will be used to carry out these activities.

How do we consider the community?

Standard construction hours on this project are **7am to 6pm Monday to Friday**.

These times are subject to change, and any updates will be published on the project webpage, yoursay.transport.nsw.gov.au/mtms-wollongong.

The project team understands construction activities may cause disruption for the community and efforts will be made to minimise impacts where possible, and ensure we adhere to strict environmental conditions relating to noise, vibration and dust management.

In line with current Australian Government guidelines around slowing the spread of Coronavirus and social distancing, all work will be carried out at a safe physical distance where possible and necessary hygiene practices will be observed.

How can we keep you informed?

We are always exploring ways to connect with the communities we work in, including through email distribution lists, frequent website updates, letterbox notifications and social media. Please visit the project webpage to let us know your preference.

About More Trains, More Services

Over the next ten years the More Trains, More Services program will simplify and modernise the rail network so that customers can expect more frequent train services, with less wait times, less crowding and more seats on a simple, more reliable network.
